

CANON ZOOM

Most Canon Pro Lenses are 8-pin types, so the customer should check to see if the lens has an 8-pin jack under the servo handle (lens handle). This jack is often covered by a rubber cap from the factory, and in some cases there are multiple jacks with other pin counts, but if the 8-pin jack is present, it should work.

CANON FOCUS

FC-C Works w/ These Known Lenses & all 'Pro-Video Series' (YH / YJ):

J8X	YH12X
	YH13X
	YH14X
	YH16X
