

The VZ-CINETRAC collapsible Dolly for use with the VZTC100A/C and VZT100A

Features:

- Fully collapsible wheel assembly.
- Swiveling third leg

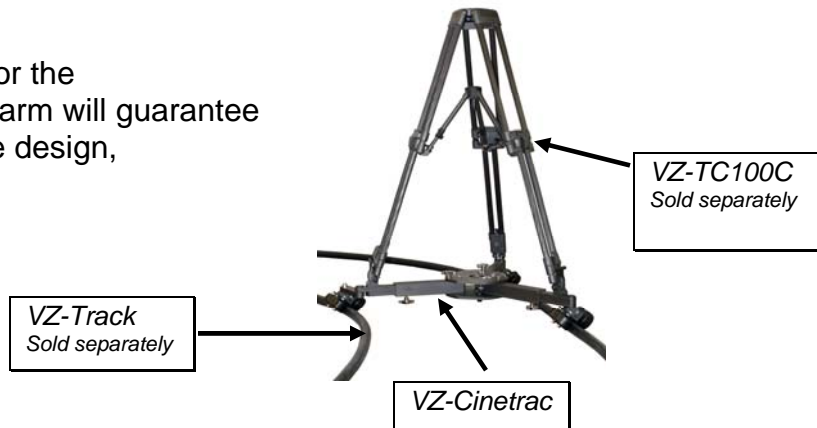

Assembly:

The dolly can be collapsed for easy storage and transport. When setting up the dolly, you must unscrew the supplied locking screws completely, in order to move the legs round till they form a triangle. After setting the legs in the correct positions, you must take the locking screws and re-screw them into the legs.

In order to mount the tripod, you must remove the rubber feet till the tripods pointed inner feet are exposed. You will notice on the dolly a location which the pointed foot will sit within. Once you have them lined up and set, you must pull the large rubber section of the dolly leg upwards and over the lip, tightening it down.

The wheels are designed specifically for the VZ-TRACK rubber track; the swinging arm will guarantee smooth motion and control. Due to the design, the dolly itself does not have brakes, so use it on a flat and even surface.

The VZ-CINETRAC tripod is covered by a one-year warranty (parts/labor). Please retain your receipt for warranty verification. All returns and repairs must be accompanied by a Return Merchandise Authorization number (RMA#). Contact us at 888-826-3399 / 512-219-7722 or at www.varizoom.com
