INSTRUCTIONS FOR VZ-HD7 SUN HOOD

The VZ-HD7 provides shade for enhanced viewing of the VZ-TFT-7 monitor in bright sunlight. Attaching the VZ-HD7 is a simple operation involving a few steps.

1. Included with the HD7 are 3 velcro strips, one long and two short. The short ones attach to the bottom of the monitor and the long one goes on top.
2. Take the sun hood and shape it so that it forms a rectangle. Hold it against the face of the monitor so you can see how it will fit. The top of the HD7 hood has a long flap with Velcro on the underside. The bottom of the HD7 has two small tabs with upward-facing Velcro. Apply a long strip of adhesive-backed Velcro to the top of the monitor where the long flap will mate to it, and apply two smaller adhesive-backed Velcro strips where the small tabs will mate to them.
3. Fold the HD7 into a rectangle (note that you can slightly adjust the hood shape by repositioning the Velcro flaps that hold it together). Align the hood with the screen and attach the Velcro flaps to the Velcro on the monitor. Because the sides of the HD7 are flexible, you should still be able to push the adjustment buttons along the sides of the monitor.
